

# Being in Control of Market Data Services Within 1 month

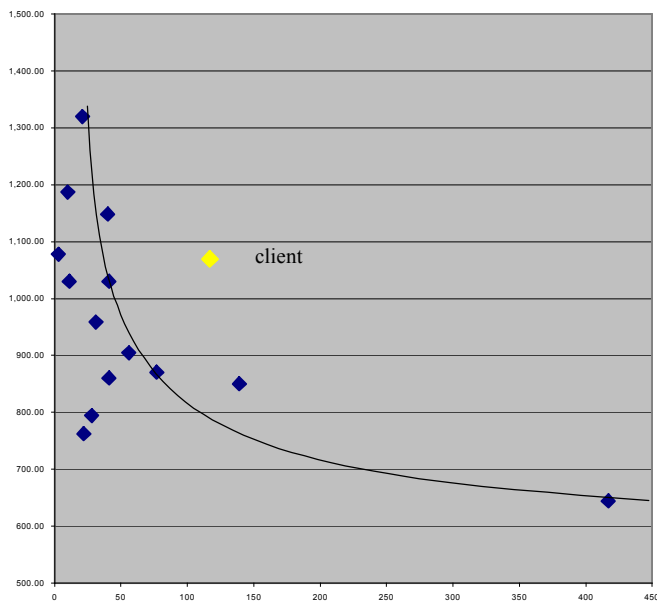

- Do your market data information services match your internal budgets and your users' expectations?
- Do you pay the right prices for services rendered?
- Are all contracted services actually installed and used?
- Are these services a 'must have' or a 'nice to have'?

Screen Consultants has a unique approach to analyse your market data infrastructure and detect market data rightsizing opportunities. This can be done quite quickly and includes recommendations 'on the fly'.

The advantage of a Quick Scan is that it confronts organisations with their own levels of cost efficiency, it does not put a burden on your day to day operations and the outcome can serve as a welcome input for the annual budgeting process.

The Quick Scan provides you in the shortest possible time a report containing optimization recommendations with respect to your market data services used, the infrastructure and prices paid for services. Recommendations often include 'low hanging fruit' but also longer term rightsizing opportunities.

Average Net cost per License (y-axis) relative to total number of licenses (x-axis) in €

#### Quick Scan in practice

- Determine scope and set criteria for analysis
- Analysis of actual usage of services
- Analysis of invoices and contracts
- Interviews with market data users in scope
- Report within 1 month
- More certainty of paying the correct costs for the best available services
- Immediate substantial short term market data cost savings
- Benchmark your organization against a Peer group
